**Microair** designs, manufactures and retails the T2000UAV-L Transponder. In our manufacturing stages we use the Aeroflex IFR6000. Details on this test equipment can be found below:-

**Aeroflex is a leading worldwide provider of highly specialized test and measurement equipment and microelectronic solutions.**

Our customers have complex, high-performance requirements and are predominantly found in the aerospace, defense, wireless mobile, broadband communications and advanced manufacturing markets. Founded in 1937 and now with 2,600 employees worldwide, Aeroflex has developed substantial intellectual property through decades of collaborative design, manufacturing, R&D and service experience with customers. Aeroflex customers depend on our unique expertise to validate the high quality and high performance of their products and get to market faster.
